Introducing the new Seneca Park Zoo Database

Created by The Fab Five: Alejandro Perez, Alyson Sion, Siying Liu, TJ Noce
This project focuses on the special events that the Zoo holds including:

• Zoobilation
• Zoo Brew
• Jungle Jog
• Zoo Boo
Link to the project’s website:

- Seneca Park Zoo Database

Here you can learn more about the zoo itself, the new database, and it’s creators.
The Current Database:

**Non-existent:** all information is stored as a hardcopy rather than electronically

- Problems:
  - Easy to misplace papers
  - Time consuming to look up any data
  - Need more workers to maintain
  - Increased human error
The New Database:

• Improvements:
  • Increased overall efficiency and sustainability
  • **Forms:** Allow for quicker input of data with less error
  • **Reports:** Generate useful information to increase the Zoo’s productivity
We hope you have enjoyed our presentation and come visit the zoo!
