Current Job Opening:
Senior Industrial Designer at our Palo Alto Offices

Reference Number:
1337

Job Description:
As Senior Industrial Designer you are required to provide leadership in the creative execution of various aspects in the BioDesign design process. The Senior Industrial Designer collaborates with the multi-faceted group of junior designers to bring a creative product from concept to production. Our ideal candidate would have a passion for design and the design way of thinking as well as the drive to work well with a multi-discipline, team-oriented environment.

Responsibilities:
- Lead the design collaborative from conception to implementation, providing a high-level of design and attention to detail
- Generation of structural design and prototypes of design concepts
- Work closely with the manufactures to follow and support designs to its completion
- Provide support for junior collaborative designers
- Demonstrate strong visual, written, and oral, communication and presentation skills
- Manage external vendors and consultants
- Manage multiple projects with diligence

Qualifications:
- Minimum of 3 years design experience
- Bachelors or Master Degree in Industrial Design or related field
- Fluency in 3D modeling and rendering software (i.e. Solid Works)
- Understanding of the prototypic and manufacturing methodology
- Experience in Project Management, Design Strategies, Marketing and Research
- Ability to travel domestically frequently and potentially internationally to the Shanghai Offices

Expected Salary:
$45 - $50 per Hour
