CSE 111
Fall 2015
Project #6

Due: Sunday, November 22, 2015 at 11:59 PM

Prerequisite Work

Prior to completing this assignment, you should review the website design material discussed in class and UB’s guide to creating your personal website at [www.buffalo.edu/ubit/service-guides/web-hosting/creating-a-personal-website.html](http://www.buffalo.edu/ubit/service-guides/web-hosting/creating-a-personal-website.html). After doing so, you should create a personal website for yourself and place it online on UB’s web server, as described below. Note that your webpage must be created from scratch by writing the HTML code yourself. The use of web authoring tools is not permissible for this assignment.

Task

Create a personal webpage for yourself. The webpage should be stored at http://www.buffalo.edu/~username/cse-111/ where username is your UBIT username. It should include information about yourself, such as your major, interests, hobbies, etc. The webpage must include each of the following components:

- An image
- Variations on font size, color, and formatting (italics, boldface, and normal text)
- Horizontal or vertical rule
- Explicitly specified background color or image
- At least one hyperlink to another webpage
- At least one hyperlink to send you e-mail (using MAILTO)
- Meta tags for both keywords and description
- Table
  ✓ Note that if your table does not include a border, it may not be visible without looking at the page source. That is fine. When grading, the grader will look at the html code to see if the table exists.

When your webpage is graded, we will be looking to make sure that each of the required components are included and that the webpage is appealing to the eye.

Grading & Submission

There is NO UBLearns submission for this lab! The grader will view your website at [http://www.acsu.buffalo.edu/~username/cse-111](http://www.acsu.buffalo.edu/~username/cse-111) where username is your UBIT username. If your website is not viewable at this URL, you will NOT receive credit for this lab! No exceptions will be made!
