

# PLANNING FOR GROUNDWATER PROTECTION

Edited by  
**G. William Page**

# Contents

Preface

ix

## 1 HYDROGEOLOGIC FRAMEWORK FOR GROUNDWATER PROTECTION

---

Mary P. Anderson

I. The Role of Groundwater in the Hydrologic Cycle	1
II. Transport of Chemicals through the Soil Zone to the Water Table	6
III. Physical, Chemical, and Biological Defense Mechanisms	9
IV. Groundwater Monitoring	13
V. Mathematical Simulation	19
VI. Areas of Uncertainty and Implications for Planning	21
References	24

## 2 THE INSTITUTIONAL FRAMEWORK FOR PROTECTING GROUNDWATER IN THE UNITED STATES

---

Timothy R. Henderson

I. Introduction	29
II. Overview	30
III. The State Role in Groundwater Protection	33
IV. Federal Laws and Institutions Protecting Groundwater	44
V. Concluding Remarks and Summary	64
References	66

## 3 DRINKING WATER AND HEALTH

---

G. William Page

I. What Microcontaminants Are Found in Water Supplies?	70
II. What Are the Health Implications of Toxic Contaminants in Drinking Water?	72
III. Cancer	73

iii

IV. Cancer Processes	73
V. Dose-Response Functions	74
VI. Animal Studies	75
VII. Epidemiologic Studies	77
VIII. Cancer Risk in Perspective	79
IX. How Can We Protect the Health of the Public?	82
X. Conclusions	83
References	84

#### 4 TECHNOLOGICAL APPROACHES TO REMOVING TOXIC CONTAMINANTS

---

Robert M. Clark

I. Introduction	89
II. Alternatives to Treatment	89
III. Treatment Options	91
IV. Conventional Treatment	93
V. Chemical Feed and Handling	99
VI. Ion Exchange	102
VII. Removal of Organics by Adsorption	105
VIII. Aeration	109
IX. Cost Comparisons	122
References	122

#### 5 DATA AND ORGANIZATIONAL REQUIREMENTS FOR LOCAL PLANNING

---

Martin Jaffe

I. Introduction	125
II. Rediscovering the Past	126
III. Local Data Needs	130
IV. Identifying Priority Areas	147
V. Establishing a Local Protection Program	151
VI. Broadening the Local Protection Program	153
VII. Conclusion	154
References	155

#### 6 LONG ISLAND CASE STUDY

---

Lee E. Koppelman

I. Physical Setting	157
II. The Groundwater System	160
III. Groundwater Problems	162
IV. Institutional Roles	175

V. Plan Recommendations	184
VI. Citizen Participation	188
VII. Implementation	195
References	201

## 7 DADE COUNTY, FLORIDA, CASE STUDY

---

Reginald R. Walters

I. Introduction	205
II. Wellfield Protection Study	216
III. Wellfield Protection Program	226
IV. Conclusion	238
References	239

## 8 WAUSAU, WISCONSIN, CASE STUDY

---

G. William Page

I. Background	241
II. Sequence of Events	243
III. Sources of Outside Assistance	248
IV. Protection Plan Elements	253
References	258

## 9 URBAN GROWTH MANAGEMENT AND GROUNDWATER PROTECTION: AUSTIN, TEXAS

---

Kent S. Butler

I. Introduction	261
II. The Edwards Aquifer and Associated Watersheds	262
III. Contributing Factors to Enactment of the Ordinances	267
IV. Watershed Development Standards	272
V. Current Events and Long-Range Issues	282
VI. Concluding Observations	284
References	286

## 10 PERTH AMBOY, NEW JERSEY, CASE STUDIES

---

G. William Page

I. Background	289
II. Nontoxics Problems at the Runyon Well Field	291

III. Toxics Contamination Problems	294
IV. Groundwater Protection Plan Components	296
References	298
<b>11 SANTA CLARA VALLEY (SILICON VALLEY), CALIFORNIA, CASE STUDY</b>	
<hr/>	
Thomas Lewcock	
I. Overview, Past and Present, of the Santa Clara Valley	299
II. The Water System of the Santa Clara Valley	302
III. Contamination Alarm—A New Awareness	305
IV. Implementation of the Model Storage Ordinance	314
V. Who's in Charge—Unresolved Issues	318
VI. Conclusion	323
References	323
<b>12 SOUTH BRUNSWICK, NEW JERSEY, CASE STUDY</b>	
<hr/>	
G. William Page	
I. The Municipality	325
II. Chronology of Toxics Pollution	327
III. Response to Well Closings	328
IV. Consulting Studies	329
V. Corporate Response to Toxics Contamination	331
VI. Government Roles in Developing Groundwater Protection Policies	333
VII. Protection Plan Elements	334
VIII. Effectiveness of Plan Components	339
References	340
<b>13 BEDFORD, MASSACHUSETTS, CASE STUDY</b>	
<hr/>	
Bonnie J. Ram and Harry E. Schwarz	
I. Introduction	341
II. Background	342
III. Hydrogeology of the Tributary Watershed	342
IV. Institutional Structure	342
V. Groundwater Crisis	346
VI. State and Local Investigations	348
VII. Results of Bedford's Technical Investigation	351
VIII. Profile of Groundwater Supplies	352

## CONTENTS

vii

IX. Significant Local Initiatives	354
X. Litigation Proceedings	356
XI. Bedford versus Advanced Metal Resource Corporation <i>et al.</i>	357
XII. Summary and Conclusion	358
XIII. Update to 1985	362
References	367

## 14 SUMMARY

---

### G. William Page

I. Complexities of the Groundwater System	370
II. Fragmentation of Laws and Institutions	374
III. Political Support	377
IV. Significant Unknowns	379
References	381

<i>Index</i>	383
