Job Title: Postdoctoral fellow
Employer: University at Buffalo, The State University of New York
Location: Amherst, New York
Date Available: 1-1-2005

Job Description:
A post-doctoral position is available for studies related to the development of novel therapies for the treatment of humoral autoimmune diseases (e.g., immune thrombocytopenia, myasthenia gravis, et al.). The successful candidate will contribute to ongoing research supported by two NIH grants (HL67347 and AI60687). The candidate should hold a Ph.D. in Biochemistry, Immunology, Molecular Biology or a related field, and the candidate should have expertise in cell culture, gene expression, transfection, protein expression, protein purification, and protein characterization. Excellent communication, interpersonal, and organizational skills are essential.

Interested candidates should send their CV and the contact information of three references to:
Joseph Balthasar, Ph.D.
