

# SUMU-MAYANGNA MERONYMS: MAPPING VOLUMES AND PROJECTING FACETS

Alyson Eggleston, Elisa Salomón, Demetrio Antolín,  
Susana Budier, Modesta Dolores, Gloria Fendly,  
Tomasá Gomez, and Elena Benedicto  
Meronymy Across Languages – UNAM  
Mexico D.F., Mexico  
September 27-28, 2013

## Goals

- Sumu-Mayangna meronym productivity
- Structural profile
- Towards a meronymy mapping algorithm (MMA)

# Sumu-Mayangna meronyms: Mapping volumes and projecting facets

1. Meronymy productivity in Sumu-Mayangna
2. Meronyms in structural context
  - Spatial expressions
  - Locations and projections
3. Toward an algorithm for domain-general meronyms
  - Algorithm
  - Duplicate assignment of meronyms
  - Structural independence
  - Interpretation and orientation preferences
4. Quantitative comparison
  - Meronymy usage in Sumu-Mayangna, Nicaraguan Spanish, and Barcelona Spanish
  - Frame of Reference (FoR) usage in Novel Objects II: 3 cohorts
5. Conclusions and Future Work

# 1. Meronymy productivity in Sumu-Mayangna

## Drawings Task

How do we measure productivity?

1. Current measure: Cross-domain usage
2. Structural properties
  - Participation in syntagmatic and lexical compounds
3. Mapping to Novel Objects I (Bohnenmeyer, 2008)  
(Levinson, 1994; MacLaury 1989)

## Domain-general Sumu-Mayangna meronyms

- Out of 2,124 (non-unique entries)
  - Human, animal, plant, artifact domains
- limiting criterion:
  - $\geq \frac{3}{4}$  domains: human, animal, and plant OR artifact

Meronym	Shape	Domain Productivity	Structural Productivity	Novel Objects I Usage
bâ	Volume	X	X	X
mak/makpa	Volume	X	X	X
tapan	Volume	X	X	X
tun	Volume	X	X	X
sapan	Volume	---	---	X
basan	Extension/Protuberance	X	X	?
dinluk	Extension/Protuberance	X	---	X
kal	Extension/Protuberance	X	X	X
nantak	Extension/Protuberance	X	X	X
sut	Extension/Protuberance	X	X	X
ting	Extension/Protuberance	X	X	X
dang	Facet	X	X	X
tang	Facet	---	X (limited)	X
muh	Facet	X	X	X
pirin	Facet	X	X (limited)	X
sait	Facet	---	X (limited)	X
sar	Facet	X	X	X
tâ	Facet	---	---	X
pan	Column	X	X	X
an	Border/Edge	X	---	---
kung	Border/Edge	X	X	X
sipintang/lawani	Border/Edge	---	---	X
rahra	Negative space: y-shaped	X	X	X
sulinh	Negative space: round	X	X	X
tinapas	Negative space	---	---	X

# 1. Meronymy productivity in Sumu-Mayangna

## Conceptual algorithm summary

- volume
- extension/protuberance
- facet
- column
- border/edge
- negative space

Geometric continuum: 2D → 3D → Junctions → Cavities

# Sumu-Mayangna meronyms: Mapping volumes and projecting facets

1. Meronymy productivity in Sumu-Mayangna
2. Meronyms in structural context
  - Spatial expressions
  - Locations and projections

## 2. Meronyms in structural context

### Structural profile

- Head-final position within nominal phrase
  - (Hale, 1994; Benedicto, 2002)
- Consistently head-final throughout the grammar.
- Nominal inflection
  - Construct state and facet-based relational noun forms (small set)

Meaning	Nominal form (construct state)	Nominal meaning	Relational noun form (3 <sup>rd</sup> Singular)	Relational noun meaning
'back'	dang-ni	'her back'	dang-ni-t	'behind her'
'face'	muh-ni	'her face'	muh-ni-t	'in front of her'

## 2. Meronyms in structural context

### Compositional compounds

- Lexical and syntagmatic

Nominal	Construct State	Syntagmatic Compound	Lexical Compound
nangtak	nangnitak	nangtak pana / nangtak panan nangtak minit nangtak sibiln  nangtak sut  tân nangtak / tang nangtak	tângnantak

## 2. Meronyms in structural context

Nominal	Construct State	Syntagmatic Compound	Lexical Compound
sar	saran	dikwa saran mahman sut saran anan saran âm saran panan saran ulun saran / sausulun saran wilu saran	kuansar ûkalnisar

## 2. Meronyms in spatial context

### Spatial expressions

- Locative (or contact reading)
  - (Meronym) + AUX CL
- Projective
  - (Meronym) + AUX CL + RN

Auxiliary Classifier	Argument
sak	non-moving, non-horizontal
lik	moving
pas	2-D horizontal
tus	3-D horizontal
wit	hanging

(Benedicto, 2002)

## 2. Meronyms in structural context

### Non-BLC spatial expressions

- Locative (or contact reading)
  - (Meronym) + AUX CL

Locative or  
contact  
reading

saran **rahran** kau kiki **lik ki**

'The ant is moving on the y-shaped-cavity of the base-facet.'  
(1\_MBN\_To\_1)

kalnibâ yak bilap kasna **sak ki**

'At the round-volume-thing of the lower extension, the fly is there  
eating.'  
(P7090071 / 1\_HMBS)

## 2. Meronyms in structural context

### Non-BLC spatial expressions

- Projective

Projective  
reading

- (Meronym) + RN + PP+ AUX CL

sasah as sâkara **muhnit yak** wit ki

'the mosquito is toward the front of the chicken.'

P7090063 / 2\_Ch

û kalni sut **yaih nit yak** baba as wit ki

'the fly is hanging there in front of the extensional tip of the lower extension of the hoe.'

P7090070 / 4\_MaH

## 2. Meronyms in structural context

(Eggleston, 2012)

	Facets	Volumes – Simple	Volumes - Complex	
			Syntagmatic Compound	Lexical Compound
	(1)	(3)	(5)	(7)
- Projection	[[[Facet(N)]NP + P] PP + AUXC]	[[[Vol(N)] NP + P] PP +AUXC]	[[[[[Vol(N2)]Mero(N1) + CS] NP+P] PP + AUXC]	[[[[[Vol(N2)]Mero(N1)+CS] NP+P]PP+AUXC]
+ Projection	[Facet(N)>(RN) [PP [AUXC]]]	[Vol(N)[Facet/(RN) [PP[AUXC]]]]	[Vol(N2)[Mero(N1) + CS[Facet/(RN)[PP[AUXC] ]]]]	[Vol(N2)[Mero(N1) + CS [Facet/(RN) [PP[AUXC]]]]]
	(2)	(4)	(6)	(8)

# Sumu-Mayangna meronyms: Mapping volumes and projecting facets

1. Meronymy productivity in Sumu-Mayangna
2. Meronyms in structural context
  - Spatial expressions
  - Locations and projections
3. Toward an algorithm for domain-general meronyms
  - Algorithm
  - Duplicate assignment of meronyms
  - Structural independence
  - Interpretation and orientation preferences

### 3. Toward an algorithm for domain-general meronyms

- duplicate assignment was not restricted

mâ niking yak sak ki kun nangtak bû pak kidi, mâ niking  
our against.RN PP AUX.CL PTC DSJ nose.N two AUX.CL DET our against.RN  
yak sak ki  
PP AUX.CL PTC

'it is in front of us, but there are two noses, it is in front of us'  
(N-A 1Ch1 00:06:38)

waralah tapan bin arauk sak kidi talnaman  
now ear.N.CS small four AUX.CL DET see.V-PST.2SG  
'now, you saw four little ears'  
(GI-M 2Ch5 3:05-3:09)

kaln binina ...talnam ainingh bas rau ki dawakat mâ muk kat  
foot.N.CS small see.V-PST.2SG FOC three AUX.CL PTC CONJ our front.RN PTC  
kidi  
DET

'the little feet you saw, in front of us, there are three of these'  
(B-B 2Ch3 00:29-00:40)

### 3. Toward an algorithm for domain-general meronyms

- structural independence

tunun mâ saitni yak kaln bin kidi, aih saitni kau kaln bin  
head.N.CS sun side.N.CS PP foot.N.CS small DET FOC side.N.CS PP foot.N.CS small  
kidi mâ kau  
DET sun PP

'the little feet of the head are pointing up, on the right the little feet are up'  
(B-B 2Ch6 00:36-00:41)

kalni binina rau kalaih, tunun utun bin tuyul yak... [...]  
foot.N.CS small AUX.CL FOC head.N.CS navel small round PP  
'the little feet that are there, in the round little navel of the head'  
(G-M 2Ch7 7:18-7:22)

### 3. Toward an algorithm for domain-general meronyms

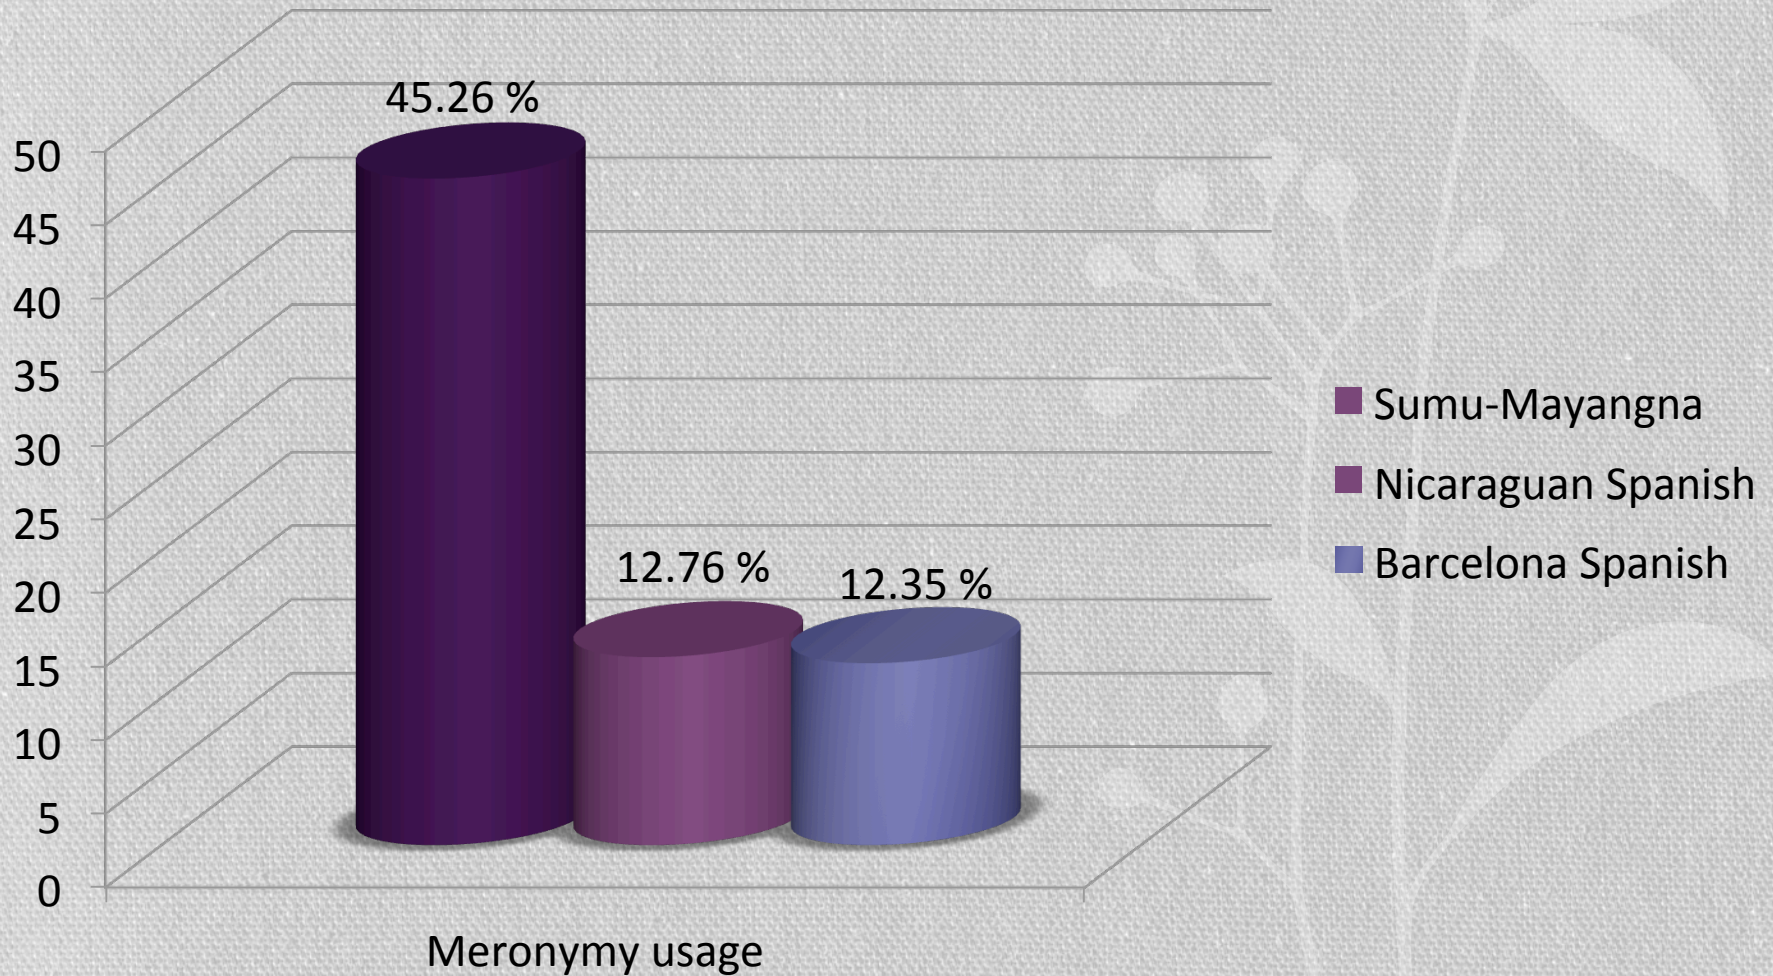

#### Algorithm

- Interpretation and orientation
  - Canonical orientation was not observed
  - Speakers interpret the object much of the time – 44%
    - But meronym generation does not flow from initial interpretation
  - Speakers orient the object a majority of the time – 78%
    - Unclear how orientation may function to identify meronyms!

# Sumu-Mayangna meronyms: Mapping volumes and projecting facets

1. Meronymy productivity in Sumu-Mayangna
2. Meronyms in structural context
  - Spatial expressions
  - Locations and projections
3. Toward an algorithm for domain-general meronyms
  - Algorithm
  - Duplicate assignment of meronyms
  - Structural independence
  - Interpretation and orientation preferences
4. Quantitative comparison
  - Meronymy usage in Sumu-Mayangna, Nicaraguan Spanish, and Barcelona Spanish
  - Frame of Reference (FoR) usage in Novel Objects II: 3 cohorts

## 4. Quantitative comparison

  - Interpretation and orientation preferences
4. Quantitative comparison
  - Meronymy usage in Sumu-Mayangna and Barcelona Spanish
  - Frame of Reference (FoR) usage in Novel Objects II: 3 cohorts
5. Conclusions and Future Work

## 5. Conclusions

Properties of Meronym Assignment	Presence?
Domain-general meronyms across 4 object classes	✓
Shape-based geometric algorithm	✓
Analogical body-mapping	X
Reflection of meronym terms in other parts of the grammar	✓
Application to novel objects (Churches I)	✓
Duplicate (or more!) assignment	✓
Structural independence	✓
Pervasive orientation of the object	✓
Pervasive interpretation of the object*	✓
Participation in spatial FoR expressions	✓

\* Part-terms were not generated on the basis of this interpretation!

## 5. Future work

- Algorithm needs to go beyond the qualitative
  - Formal protocol developed that identifies causal triggers for lexical meronymy usage (i.e., if this, then that)
  - Part term agreement among dyads
  - Further questions about Sumu-Mayangna
    - Preliminary evidence indicates Novel Objects II provided more instances (and more diversity) in meronymy usage. Why?
    - Preliminary evidence shows that instances of non-unique naming, structural independence, etc., are more prevalent in Novel Objects II. Why?
- Broad questions
  - Nature of meronymy criteria (Croft and Cruse, 2004; Cruse 1986)
    - Failures of proposed universals (Andersen, 1978; Enfield, et al., 2006)
    - Transitivity failures (Majid, 2006; Majid, et al., 2010)
    - What kinds of parameters would be included in a crosslinguistic typology of meronymies?
