- On-site Re-fueling Services
- Equipment rentals
  Aerial lifts, scissor lifts, forklifts, bucket trucks, air compressors, generators, load banks, transformers, industrial vehicles, job site ATVs, light towers, pumps, heaters, plus more

Safety matters
The American National Standards Institute (ANSI) develops safety standards for aerial lifts. The Occupational Safety and Health Administration uses the standards to ensure the occupational safety of workers while on the job. ANSI standard A92 is specific to the operation of aerial lifts, boom platforms and other combinations of such equipment.

OSHA Training Requirements
- Only trained persons shall operate an aerial lift.
- Only authorized persons shall operate an aerial lift.
- Employers shall provide training in the various precautions, safe work practices, and use of personal protective equipment needed to perform the job.
- The employer shall certify and maintain records that employees have been trained.
- Formal training shall consist of classroom type training and/or on the-job training. Proficiency testing of classroom and “hands-on” skills is required.

OSHA Regulations regarding training of operators of forklifts.
1910.178(l) Operator training.
1910.178(l)(1) Safe operation.
1910.178(l)(1)(i) The employer shall ensure that each powered industrial truck operator is competent to operate a powered industrial truck safely, as demonstrated by the successful completion of the training and evaluation specified in this paragraph (l).
1910.178(l)(1)(ii) Prior to permitting an employee to operate a powered industrial truck (except for training purposes), the employer shall ensure that each operator has successfully completed the training required by this paragraph (l), except as permitted by paragraph (l)(5).
1910.178(l)(2) Training program implementation.
1910.178(l)(2)(i) Trainees may operate a powered industrial truck only:
1910.178(l)(2)(i)(A) Under the direct supervision of persons who have the knowledge, training, and experience to train operators and evaluate their competence; and
1910.178(l)(2)(i)(B) Where such operation does not endanger the trainee or other employees.
1910.178(l)(2)(ii) Training shall consist of a combination of formal instruction (e.g., lecture, discussion, interactive computer learning, video tape, written material), practical training (demonstrations performed by the trainer and practical exercises performed by the trainee), and evaluation of the operator’s performance in the workplace.
1910.178(l)(2)(iii) All operator training and evaluation shall be conducted by persons who have the knowledge, training, and experience to train powered industrial truck operators and evaluate their competence.
1910.178(l)(3) Training program content. Powered industrial truck operators shall receive initial training in the following topics, except in topics which the employer can demonstrate are not applicable to safe operation of the truck in the employer’s workplace.

LOCATIONS
Classes can be held at our new training facility in Niagara Falls or at your location. Our Rochester branch holds classes with a 2 day advance notice.

SCHEDULING
We offer classes weekdays between 8 am and 4 pm. If you require weekends or evenings overtime rates will apply.

CLASS SIZES
Maximum class size of 15 is preferred due to time and individual attention for hands on portion of training.

COST
Please call for current pricing. Since we are more concerned with safety than making training profitable the cost of our courses are minimal. The cost includes instructor, training materials, proof of training cards and certificates.

COURSE OUTLINES
- Introduction
- Lecture
- Safety video
- Testing
- Open discussion
- Hands on
