Re: Joint Image Reconstruction and Sensitivity Estimation in Spiral SENSE

Dear Colleague:

Thank you for submitting an abstract to be considered for presentation at the scientific sessions of the ISMRM-ESMRMB Joint Annual Meeting in Berlin, Germany.

I am pleased to inform you that your abstract, (title above), has been selected for presentation in an oral scientific session. Each abstract will be allotted twelve minutes, of which nine minutes are for the presentation and three minutes are for discussion. As there will be ten papers presented during each oral session it is essential that you observe the time limitations. Your presentation is scheduled during the following oral session:

Session: Non-Cartesian Parallel Imaging
Day/Date: Tuesday, 22 May
Time: 05:20 pm

When you arrive at the meeting please verify the time of your session in the Program Book in case there have been last-minute changes.

Oral session guidelines will soon be available at the meeting website:
Be sure to monitor the website regularly for updates and changes.

Computer projection will be available in all rooms. Conventional slide projection will NOT be available. ALL presentations must be loaded onto our computer network servers in the Speaker Ready Room (The ICC Lounge on the Entrance Level) the day before the presentation. (Please carefully read and follow the special instructions included with the session guidelines.) In any case plan to arrive early at the session room to allow yourself an opportunity to meet the moderators and to familiarize yourself with the audiovisual controls.

Identifying Products and Discussing Unlabeled Uses of Products: As these sessions will offer Continuing Medical Education credit, presenters are required to observe the following ISMRM policies regarding the content of CME presentations:
All recommendations involving clinical medicine must be based on evidence that is accepted within the profession of medicine as adequate justification for their indications and contraindications in the care of patients.
All scientific research referred to, reported or used in support or justification of a patient care recommendation must conform to generally accepted standards of experimental design, data collection and analysis.
Generic and Trade Names: Presentations must give a balanced view of therapeutic options. Speaker use of
generic names will contribute to this impartiality. If trade names are used, those of several companies
should be used rather than only that of a single manufacturer.

Unlabeled Uses of Products. When an unlabeled use of a commercial product, or an investigational use not
yet approved for any purpose, is discussed during a presentation, the speaker is required to disclose that
the product is not labeled for the use under discussion or that the product is still investigational.
Please be certain to comply with these policies during your presentation.

The meeting Proceedings will be published on CD-Rom only, with the full text of all accepted abstracts
available to advance registrants online on 4 May. Submission of your work constituted a commitment by
the author(s) to present if accepted. Failure to present will jeopardize participation in future ISMRM
programs.

On behalf of the Scientific Program Committee, I thank you in advance for your participation in this year's
meeting.

Sincerely,
Georg Bongartz, Chair
2007 Annual Meeting Program Committee
