Cort Lippe

Solo Tuba Music

(composed 1987)
tuba alone

Program Notes

Solo Tuba Music was written for tubist Mel Culbertson, who premiered the work in Paris in 1987, and is dedicated to the tubist and composer David Durant.

The piece employs conventional playing, secondary and percussive sounds, and vocal sounds in a hierarchical manner. A fascinating and challenging solo instrument, the tuba is used to explore musical depth of field, intelligibility of text, and to exploit a large musical palette demanding much of the soloist.

The piece was recorded by Mel Culbertson on a Neuma Records compact disc (Neuma CD 450-71).

The text used in this work is a paragraph extracted from the novel *Gravity's Rainbow* by Thomas Pynchon:

The Meggazone is like being belted in the head with a Swiss alp. Menthol icicles immediately begin to grow from the roof of Slothrop's mouth. Polar bears seek toenail-holds up the freezing frosty-grape alveolar clusters in his lungs. It hurts his teeth too much to breathe, even through his nose, even, necktie loosened, with his nose down inside the neck of his olive-drab T-shirt. Benzoin vapors seep into his brain. His head floats in a halo of ice.

PERFORMANCE NOTES

I Percussive (lower staff)

-  pop mouthpiece with palm of hand
-  click tongue
-  click valve(s)
-  tap bell of instrument
-  tap, scrape, or stamp foot (or feet)**

II Playing and Tonguing (middle staff)

-  slap tongue on pedal tone
-  throat growl on pedal tone
-  flutter-tongue (frullato)
-  harmonic series glissando above a fundamental (usually a pedal tone) following contour line
-  (etc.) conventional playing

III Voice (upper staff)

air current noise (with air direction split by the mouthpiece half into the instrument and half outside the mouthpiece for maximum volume)

fricative or whispered word - very percussive (words or fricatives in double quotes above staff - see above for blowing directions)

(etc.)

sung with or without vowels or words - usually while playing (vowels or words placed in double quotes above the staff)

spoken word(s) - usually while playing (box connected to lowest line of upper staff)

vowels silently formed in mouth cavity while playing without producing any sound with vocal cords (box placed below the lowest line of the upper staff)

continuous glottal growl into the instrument with a constant rapid change of oral cavity filtering

IV Miscellaneous

lap, fap loud as possible, fast as possible

$\frac{1}{2}V$ — depress valve(s) half way down to produce altered internal resonance (arrow means to gradually depress valve)

$\frac{1}{2}V$ —→

↑ ↓ highest, lowest notes possible (middle and upper staves)

□ → repeat a cell of notes until the end of arrow playing notes in any order, usually as fast as possible (all staves)

▮, ▮ accel. , rit.

♯, ♯, ♯, ♯, ♯ approximately one quarter-tone higher and/or lower depending on arrow direction

⌣ harsh release of note

⌣ as **sfz** as possible

****N.B.** The foot (or feet) indications are best realized using a small amount of sand placed directly on the floor or on a flat sheet of rigid metal under the player's feet. Stamping should produce a very loud percussive sound. Scraping should produce a sound which blends dynamically with the musical context. Care should be taken that the scraping does not dominate any given texture. Room acoustics, amount and type of sand, and floor surface all play an important role in determining the dynamics of the foot indications.
