CASE STUDY 6

BACK FROM THE BRIDAL SHOWER
I. BACKGROUND INFORMATION

In the Fall of 1989 the student researcher asked a young woman, June, to tape record her interaction with her future in-laws and serve as respondent. June tape-recorded the return from a bridal shower which she had attended with Darlene, her future mother-in-law, the latter’s sister, Doris and their mother, Marie. Doris is driving the car. They get to the house and are received by the two men of the family who had stayed home: Gary, her future father-in-law, and John, her fiancé. The specimen she chose to focus on for in-depth analysis, starts in the car, very close to the house, and ends up when a telephone call interrupts the general talk about the bridal shower after which the topic changes

As described in her recollection, June is an outsider in her fiancé’s family. She does not understand them. She notes:

\[
\text{if we’re all together like eating a meal or-something} \\
\text{they} \\
\text{sometimes they argue about stupid things that have absolutely no consequence um...} \\
\text{or just talk about} \\
\text{mostly just talk about family things though} \\
\]

I like being with them it’s um...

\[
\text{sometimes they can be a little frustrating because they’re not like our family} \\
\text{they argue a lot but not...} \\
\text{they don’t...} \\
\text{they’re not mean to each other} \\
\]

\[
\text{going out to dinner with them is probably} \\
\text{not a great (laughter) thing to do} \\
\text{especially with Marie} \\
\text{because she complains a lot about stuff} \\
\text{and she’s kind-of embarrassing sometimes} \\
\text{she embarrasses them all} \\
\text{not just me} \\
\text{so (laughter) it’s not like anything new} \\
\text{she always/} \\
\text{she doesn’t like some food ya-know} \\
\text{she’s not nice when she asks to have things taken back} \\
\text{which kind-of surprises me} \\
\text{‘cause she looks like a nice little grandmother} \\
\text{but she can be a devil} \\
\text{overall feeling about being with them is good} \\
\text{it’s} \\
\text{I mean} \\
\text{I’ve gotten more and more comfortable with them since I’ve known them} \\
\text{specially Doris I think} \\
\text{‘cause she’s younger} \\
\text{and she can relate to us better} \\
\]

altogether she feels welcome there

but a little overwhelmed with the high spirited way they argue and shout at each other
PLACE OF SPECIMEN IN ENTIRE EVENT

The specimen includes contiguous episodes in three environments:
1: on the way back
2: arrival
3: in the house

The place of the specimen in the entire event is as follows:

BEGINNING: departure from the bridal shower

environment 1: on the way back
Doris is driving
they pass by a house for sale

environment 2: arrival
Doris stops the car and parks. She stays in car while the others get out and unload

environment 3: in the house
they enter the house
John is sleeping on the couch
They talk for a while
telephone call interrupts conversation

II. VERBAL FLOW STRUCTURE
A: SEGMENTATION OF TALK IN SPECIMEN

1) RESPONDENT'S SEGMENTATION:

In the Blow-by-Blow, as she listened to the tape-recording of the specimen, the respondent gave a discursive commentary of what was taking place. Then, in the Follow-up Interviewing, she grouped her commentary on the basis of the types of Talk used by the participants, as follows:

INCIDENTAL TALK (1-14)
At the beginning of the tape
Darlene was saying do this do that
and she was talking about her husband Gary because um
as we were driving down the street
there was this house that had this big pile of wood in front of it
and it just looked pretty gross
and um Darlene was saying that Gary used to say
if he had an old car he would hit people who mad *(laughter)*
messes out of their yards
and teach them a lesson

CHANGING THE SUBJECT (15-25)
After Darlene was done talking about Gary
Marie changed the subject
and started talking about this house that's for sale
two doors down from them on the street
Doris joked around that John and I should buy the house
because we're looking for a house when we get married

ARRIVAL CONVERSATION (26-34)
Doris said: "well I'll just come in for a minute, thanks"
she was being sarcastic
because she drove us all home from the shower
and nobody invited her to come in

GREETING THE MEN (35-47)
When we came into the house after the shower
John was sleeping on the couch

OFF THE SUBJECT (48-51)
As soon as we came in
Doris went out and um looked in the backyard
because the house behind my fiance's is adding on this addition
that Doris thinks is really ugly
and she was talking about how much she hates it

FAMILY SOCIALIZING (52-69 and 70-116)
While they were talking about the addition Gary was asking me what I got
and that whole section describing the napkin holder
is about this gift I got as a door prize
it was a nakin holder
it's metal and it's haped like a swan
and it's really hideous

The other prizes that they all gave me were
ice cube trays and this round tray
that looks like cut-glass but it's really plastic
and also this purple plastic strainer
and Doris was making a joke of my last name
calling it a Straney strainer

MAKING ROOM (117)
When Marie said: "move over on the couch"
she was tallking to John
'cause he was laying across the whole thing

OFF THE SUBJECT (118-119)
Right after that
Darlene says: "did you see this thing?"
she was talking about the addition
on the house in back of them again

SUMMARIZING TALK (120-129)
John asked if Carl was there
Carl is the groom-to-be

B: BASIC UNITS: INTERNAL STRUCTURE and PARTIAL RHETORICAL ORGANIZATION of TALK IN CORES

Each VF Section is now examined in turn in order to ascertain how many basic units it contains. Then, the internal structure of each basic unit, and the partial rhetorical organization of Talk in their respective cores, are described in some detail.
ENVIRONMENT 1: On the way back

The following Sections occur in this environment:

There is only one basic unit, VF Stretch (1-14). It is a TELLING, specified by the semantic schema: Darlene relates a story about her husband.
(3) DETAILED ANALYSIS OF TELLING (1-14)

(2) BASIC UNITS:

The Section is constituted by verbal responses to the triggering agent, house for sale. There are 3 basic units, as follows:

(1) VF4 SubStretch (15-17) is a NOTICING by M to all, specified by the semantic schema: Marie notices a house for sale.
(2) VF4 SubStretch (18-21) is a QUERY by Do to Da, specified by the semantic schema: Doris asks Darlene the price of the house for sale).
(3) VF4 SubStretch (22-25) is a SUGESTION by Do to Ju, specified by the semantic schema: Doris jokingly suggests to June that she and John buy the house for sale.

III. INTERACTION CLIMATE

I. INTERACTIVE MODE: PARTICIPANT ALIGNMENTS

1. through sarcastic comments at each other:
   - Doris to Darlene and Marie (26-28)
   - Darlene to John (35)
   - Doris to Darlene (87-92)

   they argue a lot  
   but they’re not mean to each other  
   high spirited way they argue and shout at each other

2. through sarcasm at outsiders:
   a) individual comments:
      - Darlene (54), (64-66), (72), (97)
   b) ritual banter trios:
      - Darlene, June and John (37-45)
      - John, Doris and June (102-113)

Relationship between June and the family:
   She is sometimes left out of the conversation (52-94) and she gets frustrated by it.
   She joins in the family bonding through sarcasm at outsiders (38),(41-42), (113)

   Bonding occurs between Doris and June through joking (22-24)

   I’ve gotten more and more comfortable with them
   specially Doris I-think
   ‘cause she ‘s younger
   and she can relate to us better

Relationship between Marie and the rest of them:
She is capable of nastiness, as when she draws attention to John’s inattention (117)

   she looks like a nice little grandmother
   but she can be a devil

Relationship between Gary and June:
The fact that Darlene does not let him interact with June (58) is not mentioned by June
either because she does not notice it or because she does not want to talk about it.
