

# THE PORKARD REPORT

OCTOBER 1991

## HOBBY GETS BUTCHER JAILED

Mild mannered butcher Frank N. Swine has been jailed as a result of what he considered a hobby. Frank opened his meat shop eleven years ago. Since that time Frank has earned the re-

spect of his patrons as the best butcher in town.

What we did not know was that in the basement of his shop Frank N. Swine was conducting experiments using left over bits and pieces that no one would buy to create a living organism. Frank worked late into the nights piecing together whatever parts he could find. Progress was slow but he was finally able to create a living thing.

All went well until it escaped. Many were injured by the rampaging monster. Frank was forced to kill the monster that he lovingly created.

Frank said, "I just wanted to create something that could be eaten at large gatherings. Roast it over a pit and your guests could have their choice of beef, chicken, or lamb. I didn't want to hurt anyone."

## RANDOLF GETS FACE LIFT

Premature aging caused by the UV light emitted from his nose has forced Randolph the Red Nose Pig to undergo plastic surgery.

Randolf said, "The decision was not an easy one, but after

looking in the mirror, it was the only one I could make. Now when I look in the mirror I'm sorry I had it done."

The plastic surgeon remarked, "Randolf's skin was very wrinkled. I think I may have tightened it just a little too tight. I don't understand what the problem is. I told him I would fix it for free."

## FEMINISTS BLAMED FOR OZONE DAMAGE

In a recent paper, Dr. Tipple of the Institute of Ozone Study put forth the notion that the activities of feminists are responsible for damaging the ozone layer of our atmosphere.

Dr. Tipple remarked, "The release of tons of ozone damaging chemicals resulted from burning bras. It would take years to see the effects and I fear those years have past.

Feminists are calling the paper "a bunch of hog wash."

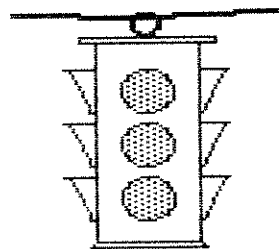

## HAUNTED TRAFFIC LIGHT?

Strange circumstances have surrounded the occurrence of several accidents caused by a malfunctioning traffic light. Maintenance crews have been unable to find the problem.

All the victims of the accidents were witnesses to a shooting that took place

on the corner a year ago. No one was able to identify the assailant until they realized the connection between their accidents and the shooting.

One witness said, "What's the difference? Either the hoodlum gets me or the traffic light. If I'm

lucky the shooter will go to jail and the spirit will leave the traffic light. Only then will I feel safe enough to drive through town."

## Letter to the Editors

Dear Editor,

I realize that the trouble in the Middle East is not over. As time passes I have noted that Saddam Hussein has been referred to as a fascist pig. I understand "fascist" to be derogatory, but who are you trying to insult?

Yours truly,  
Erma Kiddin
