Chapter 11

Aircraft Weight Distribution

Table of Contents

11.1. Introduction
11.2. Aircraft Center of Gravity Calculation
11.3. Center of Gravity Range
   11.3.1. Fixed or Variable Center of Gravity
   11.3.2. Center of Gravity Range Definition
   11.3.3. Ideal Center of Gravity Location
11.4. Longitudinal Center of Gravity Location
11.5. Technique to Determine the Aircraft Forward and Aft Center of Gravity
11.6. Weight Distribution Technique
   11.6.1. Fundamentals of Weight Distribution
   11.6.2. Longitudinal Stability Requirements
   11.6.3. Longitudinal Controllability Requirements
   11.6.4. Longitudinal Handling Quality Requirements
11.7. Aircraft Mass Moment of Inertia
11.8. Chapter Example
Problems
