Unbounded Dependency Constructions: Theoretical and Experimental Perspectives

Rui P. Chaves & Michael T. Putnam

Draft of June 1, 2020
## Contents

1 Introduction  
1.1 Unbounded Dependency Constructions .................. 1  
1.2 Grammatical Constraints ............................... 8  
1.3 Grammatical Theories ................................. 12  
1.4 Real-time Processing ................................. 18  
1.5 Overview ........................................... 21  

2 Extraction Types ........................................ 25  
2.1 Overview of UDCs ................................... 25  
2.1.1 Interrogative .................................... 27  
2.1.2 Declarative ....................................... 33  
2.1.3 Subordinate ....................................... 36  
2.2 Filler-Gap Dependency Types .......................... 45  
2.2.1 Singleton ......................................... 46  
2.2.2 Convergent ....................................... 54  
2.2.3 Cumulative ....................................... 57  
2.3 Filler-Gap Mismatches .................................. 60  
2.4 Summary .............................................. 65  

3 Extraction Constraints .................................. 67  
3.1 The source ambiguity problem ........................ 71  
3.2 Island Phenomena ..................................... 79  
3.2.1 NP Constraint ..................................... 81  
3.2.2 Specified Subject Constraint ....................... 88  
3.2.3 Complex NP Constraint ............................ 91  
3.2.4 Bridge Verb Phenomena ............................ 94  
3.2.5 Coordinate Structure Constraint ................... 99  
3.2.6 Subject Constraint ................................ 105
## Contents

3.2.7 Adjunct Constraint ........................................ 118  
3.2.8 Negative Islands ........................................... 126  
3.2.9 Wh-Islands .................................................. 129  
3.2.10 Complementizer Constraint .............................. 133  
3.2.11 Frozen Structure Constraint .............................. 137  
3.2.12 Left Branch Condition .................................... 140  
3.3 Resumptive UDCs ............................................... 142  
3.3.1 Grammatical Resumption .................................. 142  
3.3.2 Constraint-avoidance Resumption ....................... 144  
3.3.3 Processing resumption .................................... 146  
3.4 Islands in other dependencies? .............................. 147  
3.4.1 Ellipsis ...................................................... 147  
3.4.2 Quantifier Scope ........................................... 150  
3.4.3 Interrogative Scope ....................................... 153  
3.5 Summary ....................................................... 162  

4 Movement-based approaches ..................................... 167  
4.1 Introduction .................................................... 167  
4.2 MERGE and MOVE ............................................. 169  
4.2.1 The Strict Cycle ........................................... 179  
4.2.2 Multiple gap UDCs ....................................... 181  
4.2.3 Improper Movement ...................................... 186  
4.3 Island Constraints ............................................ 189  
4.3.1 CED Effects ............................................... 189  
4.3.2 Wh-Islands ............................................... 194  
4.4 Psychological Plausibility ................................... 198  
4.4.1 Three views of Movement ................................ 204  
4.5 Summary ....................................................... 213  

5 Non-Movement-based approaches ................................ 215  
5.1 Gazdar’s (1981) phrase-structure model .................. 216  
5.2 A Constructional HPSG Approach ............................ 227  
5.2.1 Lexical Constructions ................................... 228  
5.2.2 Phrasal Constructions ................................... 239  
5.2.3 Constructional GAP propagation ....................... 246  
5.2.4 Predicted Island Effects ................................ 272  
5.3 Models of processing ......................................... 278  
5.4 Summary ....................................................... 280
Index
