High Rise Construction **Moving Well**

Construction is going at near full speed at the 11-story high rise apartment complex in North Main street, Dunkirk.

The building, which will be the tallest in the county when completed next year, will contain 104 apartments for the housing of Dunkirk's elderly citizens. The project is the first step in urban renewal for the

city. The second floor has been completed and work is now concentrated on the columns to the third floor- Decking for the third floor is expected to be installed by next week. Each floor is expected to take three weeks to construct.

Work will continue on the building as long as weather permits and is expected to continue off and on all winter.

The \$2.4 million project is being financed entirely by the federal government. The elderly citizens who will be displaced by the urban renewal in Dunkirk will be given first priority on the apartments.

Joseph Anderson of Fredonia is the clerk of the works. His duties include inspecting the construction and making reports to the architect and to the Housing and Urban Development (HUD).
