All About Me: Tammy Lau

A RIDICULOUSLY GENERAL PRESENTATION ABOUT MYSELF
The Basics: I am...

I am...

- exactly 5 feet tall
- Vietnamese/Chinese American
- From Vermont, the Green Mountain State
- Not interested in sports, so I have no favorite sports team
The Academics

I am a 3rd year student intending to major in Medical Technology (MT). I hope to...

- Graduate
- Work as Medical Lab Technician
- Go back to school for 2nd degree or graduate school!
Things I like about UB

- Perfect sized campus
- Great community of people
- Has many different clubs and groups to join
- Resources are easily accessible
Things I would change about UB

- The distance between North and South Campus
- Cost of out-of-state tuition
- More and cheaper food options
- More student parking lots!!

Things I’ve learned in CSE 101

I’ve learned how to effectively use Microsoft Excel, PowerPoint, and Word. I’ve learned how to do very basic HTML programming. I learned a whole lot about what a computer actually is and what it does, what the internet is, and how to keep myself and my technology safe. Before this class, I understood very little about computers and the internet, and I couldn’t even get the basics of Microsoft Excel, PowerPoint, or Word. Honestly, I didn’t think CSE 101 would be useful but I’ve learned a lot of useful skills that I can actually use in everyday life!
