ABOUT ME

Name: Theodore Chan
Major: Pharmacy
Class Standing: Junior
WHAT I WANT TO BE AFTER I GRADUATE

- I want to be able to communicate with my clients and be able to improve their health in any way possible
- I want to discover new types of drugs that can possibly change the world
- I wish to be a pharmacist when I graduate from Buffalo
MY FAVORITE SPORTS TEAM

• My favorite sports team is the USA T&F
• They are by far the strongest team in the world with many of my track inspirations
• They dominate a majority of events
WHAT I LIKE ABOUT UB

• UB has a wide variety of food that I like especially Pistachio’s although it is really fattening
  • For example, C3 has a lot of different kinds of food everyday from different cultures.

• I go to the library often and I find that most of them are very nice and quiet where I can concentrate on my studies.

• While I was choosing classes, there were so many options I can take! I couldn’t decide which to take. What I hard decision!

• The people here are generally very friendly
WHAT I WOULD LIKE TO CHANGE ABOUT UB

1. There are so many smokes on campus. If there are not going to do anything about this, UB should at least make if not already more smoking zones.
2. Prices of certain foods are too damn high!
3. The meal plan system needs to change. If the meal swipe allows $8 and I just used $6.50, wheres my other $1.50?
WHAT I LEARNED IN CSE101

- I learned different operating systems and how they interact with other components and the user itself. It’s actually quite simple.
- I learned the different components that make up the computer.
- I learned that computers are all around us. Not just at home, but in our hands, in the hospital, and above us.
- Different softwares
- Professor Cleary will never be able to get a plunger to stick to the lecture room door
- Professor Cleary is a geek (which he highlighted at least 20 times)
