# **Introduction to Logical Reasoning**

# Problem Set #6

Although I strongly suggest that you write out answers to all these problems, *you do not have to turn in any written responses*. You do, however, need to be prepared to do these types of problems, for *questions on the weekly quizzes and exams will primarily be drawn from the problem sets*. The solutions to these problems will be provided, so you can check your own work and seek help from me as necessary.

We will devote considerable time to these problems during the next in-class workshop. In order to make that workshop productive, please make a solid start on them. That way we can use the workshop to look at the problems that presented the most difficulties.

If you do the Extra Credit Logic Puzzle, you must turn in your *type-written* solution at the *beginning* (i.e., within the first ten minutes) of class on Sunday, February 20<sup>th</sup>.

### Parts A and B Instructions

Each of the following problems presents a statement in English. Translate each into the language of symbolic logic, using capitical letters to label each simple proposition involved. (Please note that I did not come up with these statements, but they were taken from a common textbook on logic.)

### Parts C Instructions

Each of the following problems presents a statement in logical form. Construct a truth table for each, and denote whether it is a tautology, a contradiction, or a contingent statement.

### Part C Problems

- 1.  $[p \rightarrow (p \rightarrow q)] \rightarrow q.$
- 2.  $p \rightarrow [(p \rightarrow q) \rightarrow q].$
- 3.  $(p \& q) \& (p \rightarrow \sim q)$ .
- 4.  $p \rightarrow [\sim p \rightarrow (q \lor \sim q)].$
- 5.  $p \rightarrow [p \rightarrow (q \& \sim q)].$
- 6.  $(p \rightarrow p) \rightarrow (q \& \sim q)$ .
- 7.  $[p \rightarrow (q \rightarrow r)] \rightarrow [(p \rightarrow q) \rightarrow (p \rightarrow r)].$
- 8.  $[p \rightarrow (q \rightarrow p)] \rightarrow [(q \rightarrow q) \rightarrow \sim (r \rightarrow r)].$
- 9.  $\{[(p \rightarrow q) \& (r \rightarrow s)] \& (p \lor r)\} \rightarrow (q \lor s).$
- 10. {[ $(p \rightarrow q) \& (r \rightarrow s)$ ] &  $(q \lor s)$ }  $\rightarrow (p \lor r)$ .

**Note:** There may a lot of exercises here. Do not feel obligated to do all of them. I often assign many exercises so that you have plenty of opportunities to practice the skills these exercises are trying to impart. I suggest doing just enough of them so that you are confident that you could use these skills on a quiz or an exam.

#### Extra Credit Logic Puzzle (Hard)

Austin Powers, international man of mystery, was shot, killed, and vaporized with a laser ray gun by a criminal syndicate because he almost had enough evidence to shut it down. After considerable effort on the part of Interpol, five suspects were brought before the lead detective of Scotland Yard, who asked them what they had to say for themselves. Each suspect made three statements, exactly two of which are true and exactly one of which is false. Their statements were:

**Dr. Evil:** I did not kill Powers. I never owned a laser gun in all my life. The Frau did it.

Number Two: I am innocent. I never saw Mini Me before. The Frau is guilty.

**Mini Me:** I did not kill Powers. Fat Man is the guilty one. Number Two and I are old pals.

Fat Man: I did not kill Powers. I never owned a laser gun. The others are all blaming someone else for the murder.

**The Frau:** I am innocent. Mini Me is the guilty one. Dr. Evil did not tell the truth when he said that I did it.

#### Question: Who murdered Austin Powers?

To receive any credit you must justify your answer with a logical argument showing why you are 100% right. That is to say, this question has a definitive answer that can be justified without *any* guessing on your part.
