

Introduction to Logical Reasoning

More on Diagramming Arguments

Professor David Emmanuel Gray

Northwestern University in Qatar
Carnegie Mellon University in Qatar

Argument 1

Diagram the following argument:

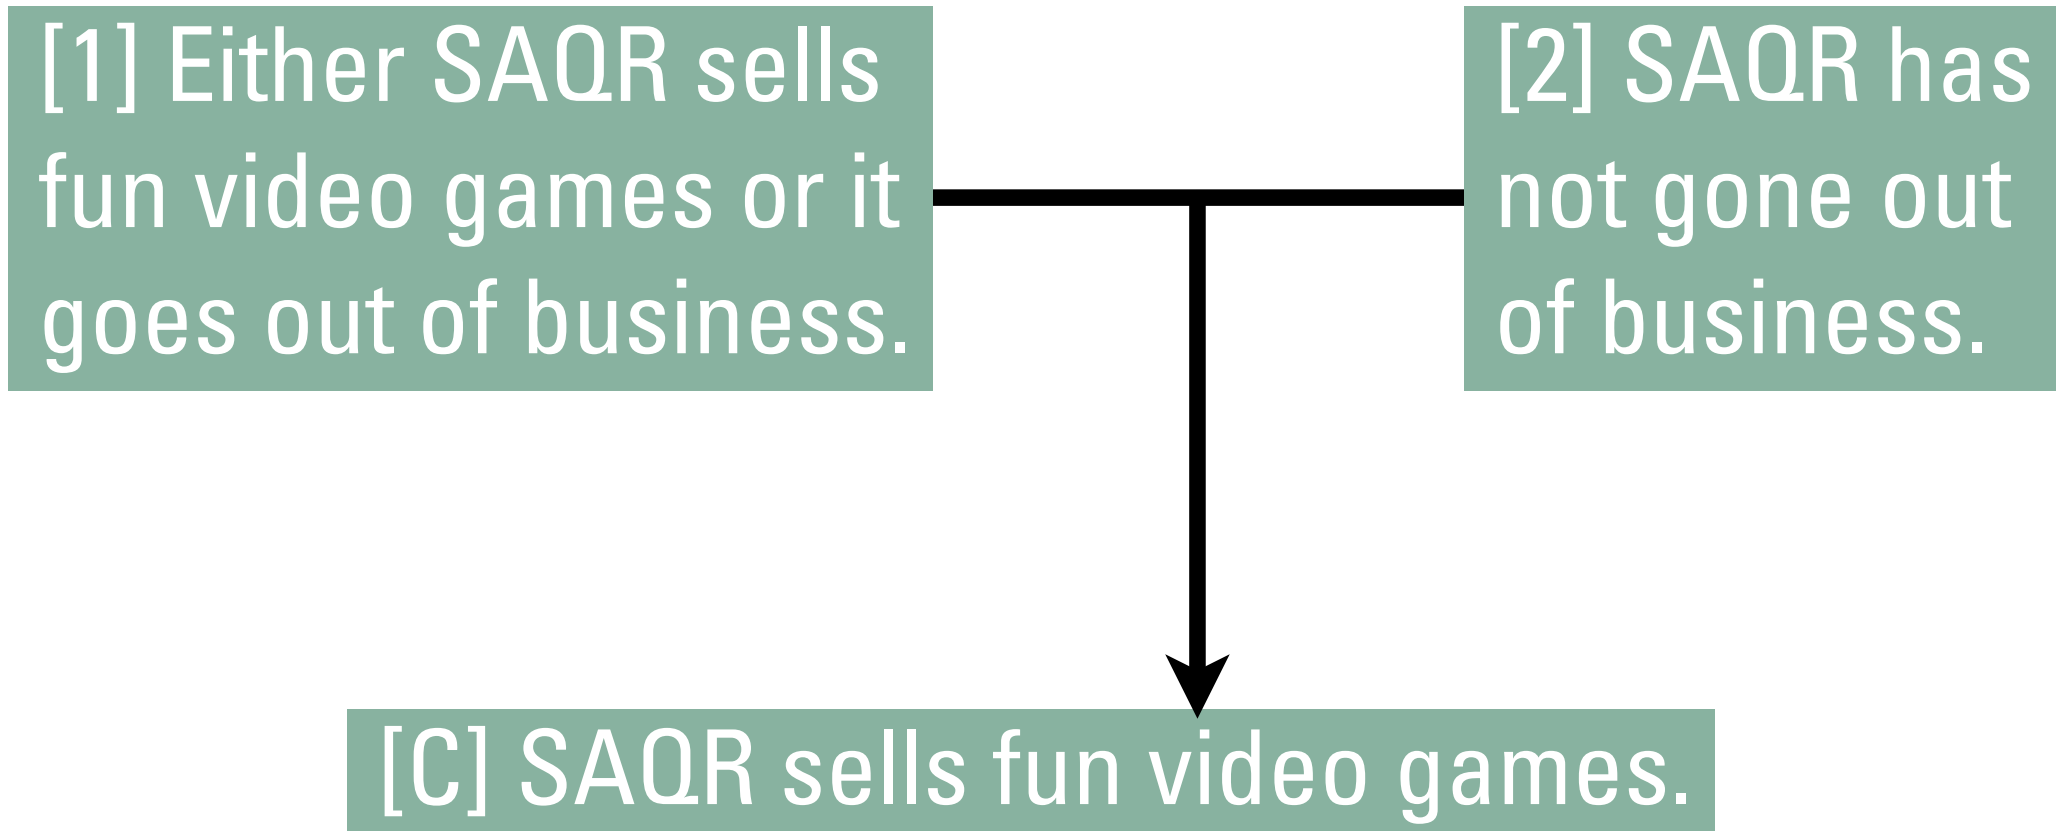

Either SAQR sells fun video games or
SAQR goes out of business, and therefore
SAQR sells fun video games since SAQR
has not gone out of business.

Argument 1 (Parsed)

Diagram the following argument:

1 Either SAQR sells fun video games or
SAQR goes out of business, and therefore CI
C SAQR sells fun video games since SAQR
has not gone out of business. PI 2

Argument 1 (Diagrammed)

Argument 2

Diagram the following argument:

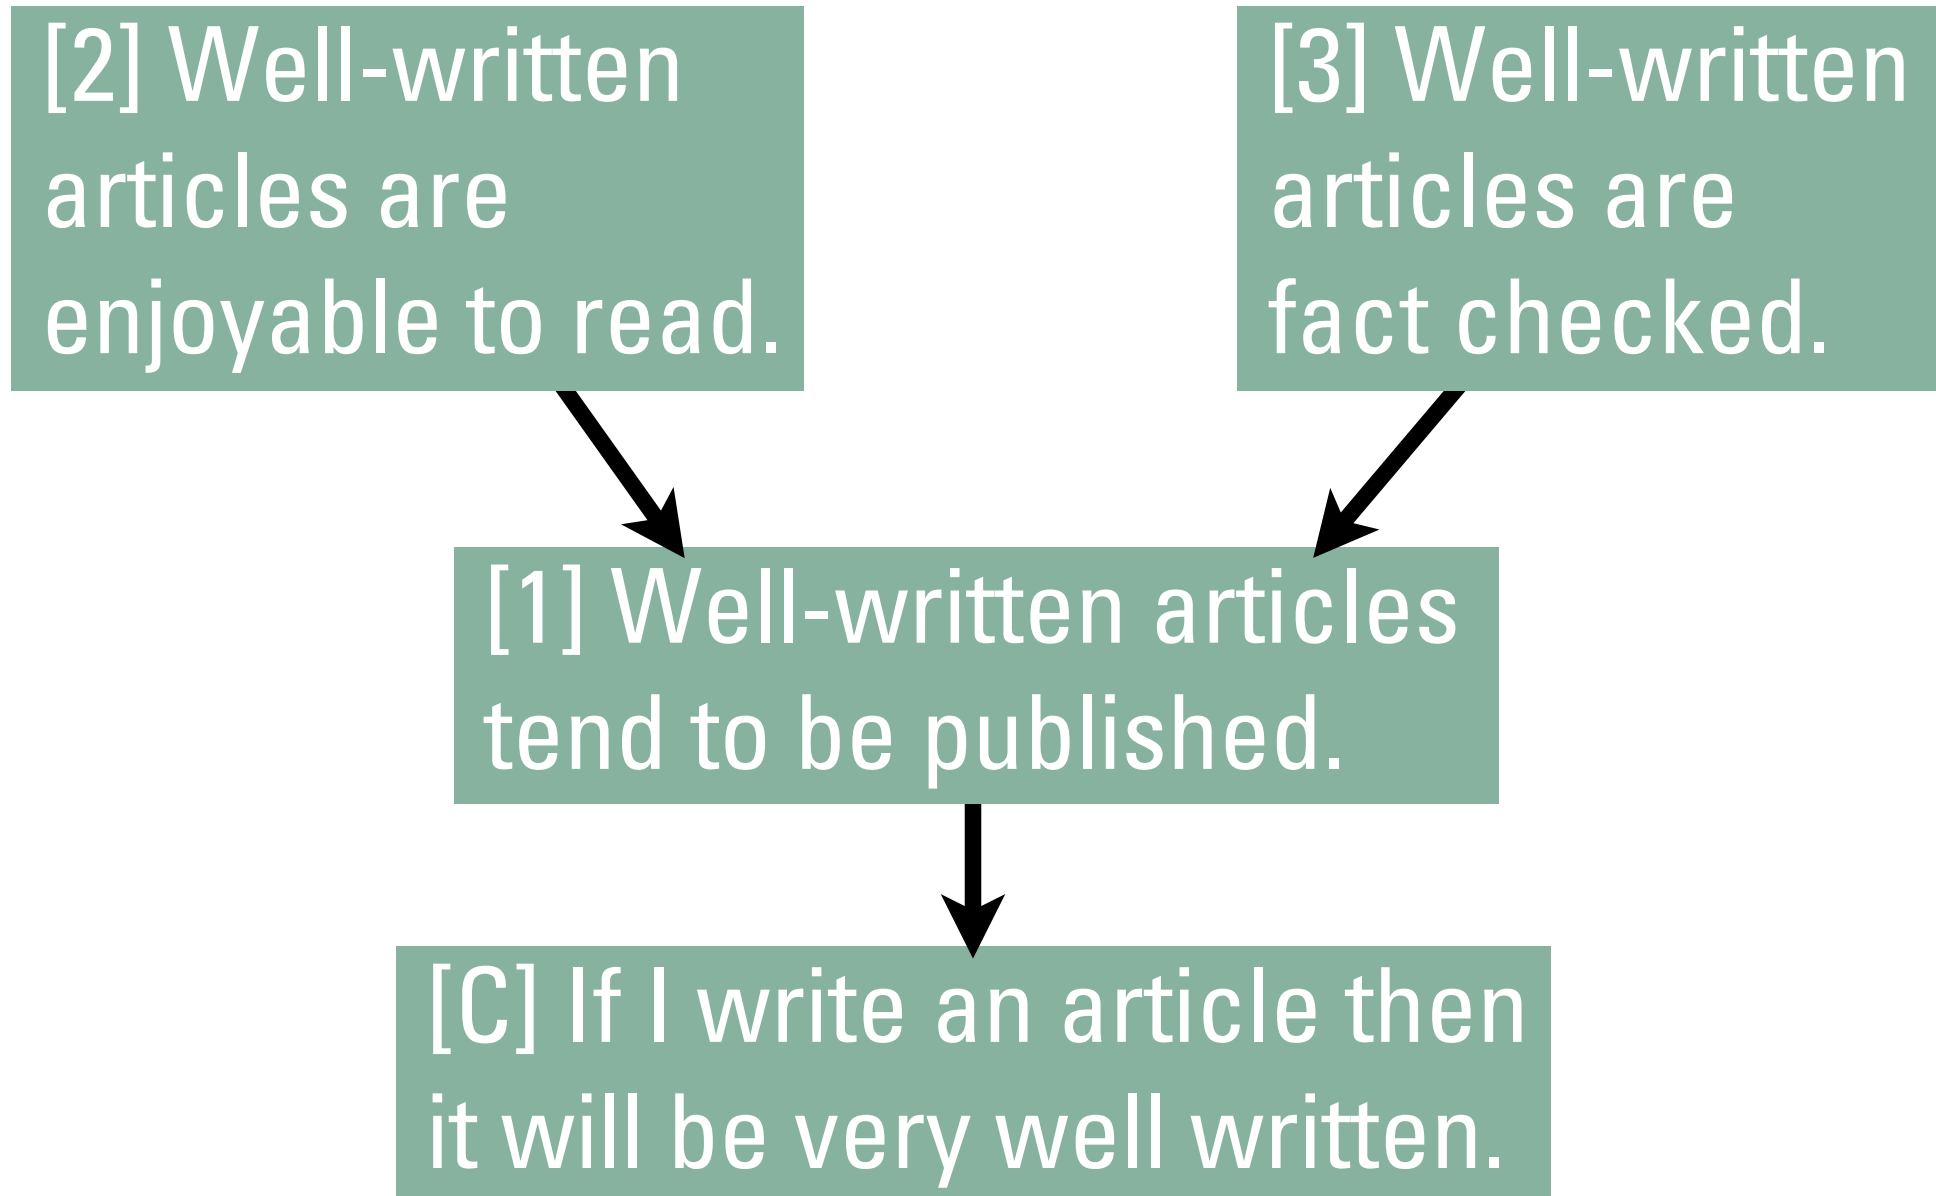

Well-written articles tend to be published because they are enjoyable to read and they are fact checked. Consequently, if I write an article then it will be very well written.

Argument 2 (Parsed)

Diagram the following argument:

¹Well-written articles tend to be published
P| ²because they are enjoyable to read and they ³
are fact checked. Consequently, if I write an
article then it will be very well written C

Argument 2 (Diagrammed)

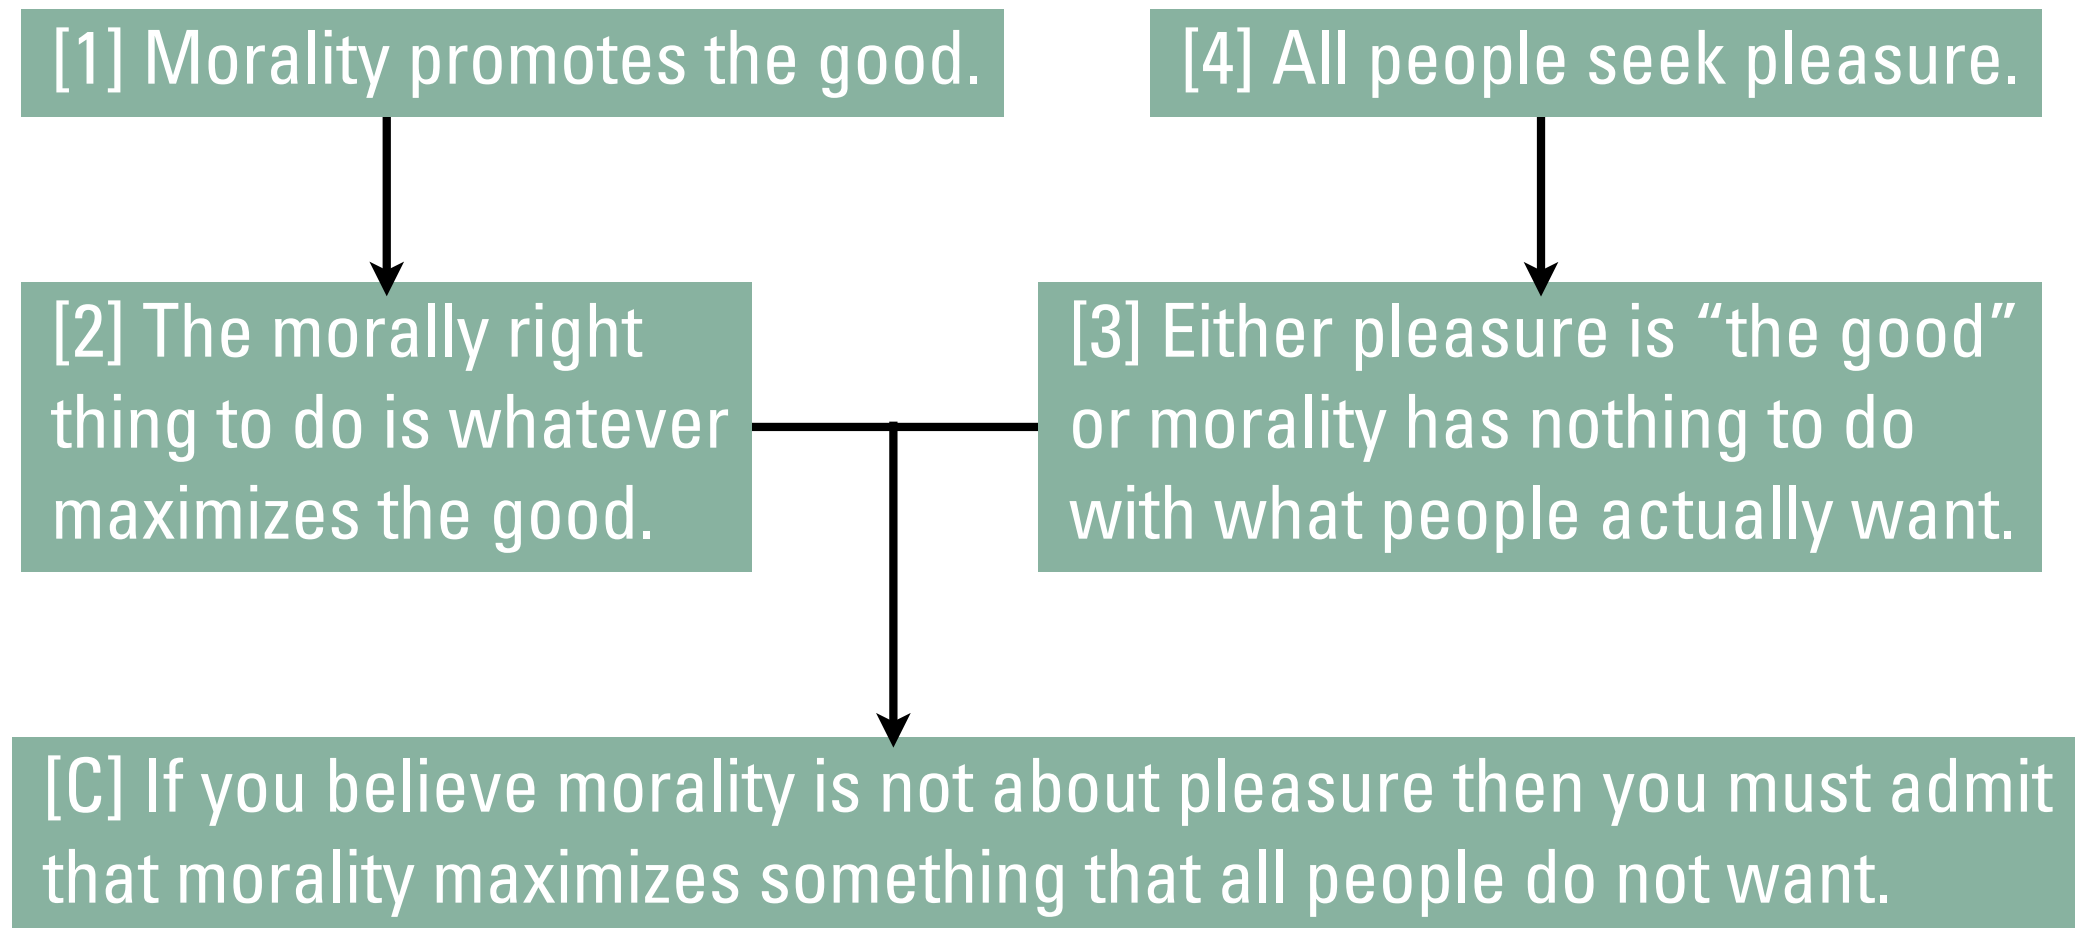

Argument 3

Morality, by definition, promotes the good, and so the morally right thing to do is whatever maximizes the good. But either pleasure is “the good” or morality has nothing to do with what people actually want since it is obvious that all people seek pleasure. Consequently, if you believe morality is not about pleasure then you must admit that morality maximizes something that all people do not want.

Argument 3 (Parsed)

¹ Morality, by definition, promotes the good, and so ^{CI}
² the morally right thing to do is whatever maximizes
the good. But either pleasure is “the good” or morality ³
has nothing to do with what people actually want
^{PI} since it is obvious that all people seek pleasure. ⁴
^{CI} Consequently, if you believe morality is not about ^C
pleasure then you must admit that morality
maximizes something that all people do not want

Argument 3 (Diagrammed)

Next Class...

We will have a workshop on diagramming arguments.
