Correction to "Bayesian analysis for uncertainty estimation of a canopy transpiration model" by S. Samanta et al.

[1] In the paper "Bayesian analysis for uncertainty estimation of a canopy transpiration model" (*Journal of Geophysical Research*, *43*, W04424, doi:10.1029/2006WR005028), equation (3) contained an error. The correct equation (3) appears below:

$$L_c = \begin{cases} \dfrac{1 - e^{-K_b L}}{K_b}, & \text{for sunlit class} \\[2ex] L - \dfrac{1 - e^{-K_b L}}{K_b}, & \text{for shaded class} \end{cases}. \qquad (3)$$
